

**Welch Allyn**  
Advancing Frontline Care™

# Comprehensive Plus Programme

A service Programme designed specifically for your busy medical practice

Managing equipment can be difficult – especially when it needs repair or calibration. Not only does this mean extra work to sort it out, it also means that services for your patients are affected as well. Cancelled appointments and missed referrals can all result from equipment downtime.

The Welch Allyn Comprehensive Plus Programme (incorporating the Comprehensive Partnership Programme) is designed to help manage your equipment and ensure it continues to help you care for your patients.

Up to five years additional peace of mind is available on the complete cardiopulmonary range.

What will the programme include for you?
